He has been at work in New London and living with his wife but went to Torrington and married another young woman. He is now 23 and was married at 18.

IMPROVEMENTS BEING MADE AT WOMAN'S COLLEGE.

Interiors of Several Rooms Have Been Redecorated for Coming Term.

On account of several breaks in the winter pipes, from freezing last winter, which discolored the walls and ceilings of several of the rooms in the dormitories at Connecticut college, it was necessary to redecorate the interiors of several of the rooms. The work was completed a few days ago, and the furniture replaced, hangings, window draperies and cushions put into place in readiness for the resident students who will arrive on Monday morning.

The office of the secretary, which has been located in one of the rooms in Plant house last winter, will be removed to the room in New London hall originally designed for that purpose. The new bookcase for the catalogues and other books for use in the administrative offices, has been placed in the office of the president's secretary. The case in made of wood to match the finish of the office.

Equipping the dining hall for the service of the new class is also being done. The new lot of china and glass, which is a duplicate of the ware used last year, having been put in.

The dining hall, which will be under the same management as last year, will have the service of students as waitresses, as was the case during the latter part of last term. The use of students as waitresses was much more satisfactory in every way, it was found, and was also of help to students who were desirous of working their way through college.

With the additional tables and chairs necessary to seat the entire resident study body, every available inch of the dining hall will be utilized.

Connecticut Patents.

The list of patents issued to Connecticut inventors, reported by Frank H. Allen, follows: Charles E. Adamson, Derby, ribbon feeding mechanism for duplicating machines; John W. Brooks, Stamford, valve cutting machine; Forest N. Buckland, Manchester, latch support for robbing criglass; Henry B. Cooley, New Britain, machine for affixing attachments to envelopes; Elsworth A. Hawthorne, Bridgeport, acoustic apparatus; Wilfred Cunliffe, Coscob, packing case; Christen R. Kaddeland, Derby, machine for making motion picture film; New Haven, window operating mechanism; Fred Lux, Waterbury, motor; Richard Liebau, New Haven, motor; Adolph C. Recker, Waterbury, flashlight; Adolph C. Recker, Waterbury, curtain fastener; Charles F. Ritchel, Bridgeport, thief proof treasure box; Patrick P. Roach, Bridgeport, grinding machine; Vincente Scamier, Terryville, fluid burning lamp; Ernest C. Wilcox, Meriden, wire terminal; George A. Wood, Southington, making tool shank and handle.

fall, they make up in elegance of material for their lack of adornment. Besides, the trimming used is so rich and so artistic that anything more would be in violation of good taste as of good style.

Metal ornaments stand at the top of the list as favorites. Feather bands were never in greater popularity. Flowers are elegant and modish, while fruits, wings, heads, bead and metallic flowers in made designs, military motifs, oriental cabochons, and the like come in endless variety and bewilderment.

Merchants are desirous of having shoppers see and admire and select from the wide lines of stock which they are carrying for the fall and winter trade.

BURGLAR SCATTERS JEWELS CARELESSLY ON LAWN

Indications Are That Breaks Were Perpetrated by an Amateur.

The New London police are working on several important clues which may lead to the running down of the daring burglar whose operations at the residences of Vernon C. Brown and Robert Moore of 560 and 741 Pequot avenues, near his rough, estimated at \$2,000 to \$2,500 Tuesday evening. Patrolman Samuel Hick was assigned Wednesday afternoon to assist Patrolman Timothy Sheehan of the Pequot district in his investigation of the two breaks.

Information gathered by the police in their investigation seems to point to the breaks having been perpetrated by an amateur, or at least by a man whose knowledge of the value of jewelry and gems was vague. In some respects the breaks appear to have been the act of an insane man.

It is without doubt one of the strangest robberies that has ever come to the attention of the New London police officials. Several of the most valuable articles gathered up as loot by the perpetrator were found distributed about the lawns of the two residences Wednesday afternoon.

One of the most valuable articles stolen from the Brown residence was a ladies' gold watch set with diamonds, the property of Mrs. Brown. Thursday afternoon the watch was found on the lawn, where it had been thrown or dropped by the burglar. On the opposite side of the house servants of the family found two valuable diamond earrings and a hair pin with a pearl setting. Several other articles of minor value were found in the grass.

At the Moore residence a silver-backed brush belonging to Mrs. Moore was found on the lawn Wednesday, also several other valuable articles. A gold watch belonging to Mr. Moore, valued at \$1,000, was also found by the robber, although it lay on a dresser in full view in one of the rooms which were ransacked.

Probably the most valuable article of loot obtained at the Moore residence was a \$600 diamond brooch pin of Mrs. Moore. Cash to the amount of \$25 was also carried off. It was contained in several pocketbooks found in different rooms of the house. The empty pocketbooks have been recovered.

Contrary to the original belief of the police, the thief must have had the assistance of an accomplice in gaining an entrance to the Moore house. That he also took his time in ransacking every room on the second floor is the opinion expressed by the investigators, and probably remained in the house fully an hour. There is some doubt in the minds of the police as to how he entered the house, although it is admitted that a ladder was used.

That the burglar was familiar with the surroundings at both residences is not doubted by the police. It is also possible that in the event of an arrest the accused may prove to be a society burglar, who worked with the aid of an automobile and covered his tracks long before the police caught up with his trail.

HAMBURG FAIR STIRRED BY FALSE ALARM.

Ticket Taker Thought He Had Been Robbed of \$200.

The symphony of howling herds at the Hamburg fair Wednesday was drowned in the uproar which ensued when J. R. Warren, taker of dinner tickets, jumped to the conclusion that he had been robbed of \$200 received from the sale of the pastebreads. Mr. Warren not only jumped to the conclusion but he jumped for help simultaneously. A general search for pickpockets followed. Then Mr. Warren recollected he had turned over the money to the treasurer of the fair and peace was restored.

The attendance at the event was a trifle smaller than a year ago, the total reachin about 1,500. There were more automobiles than ever, it being estimated that fully 500 were on the grounds. The exhibits were up to the customary high standard.

Files Corporation Papers. A certificate of incorporation was filed Thursday in the office of the secretary of the state by the News Bulletin Display company of New London, showing authorized capital stock of \$100,000. The News Bulletin Display company has 2,000 shares of \$50 each. The incorporators are M. L. Neland, Arthur H. Slack and Henry Amerman.

Two Agreements Filed. These two compensation agreements were filed with the clerk of the superior court in Norwich Thursday: New London Marine Iron Works Co. and Patrick Saunders of Pequot avenue, foot burned July 1, \$10 weekly. Falls Co. of Norwich, and William Witchevsky, bruised right foot, Aug. 30, \$6.36 weekly.
